1. The IDS filed 3/24/04 has been reviewed. However, as no copy of WO 85/02205 was provided and the Examiner was unable to find a copy of this document, it was not considered.

2. The following is an examiner's statement of reasons for allowance: For reasons consistent with that provided by applicants in their response the instant claims are not rendered obvious by the prior art. Specifically the teachings in Kanner do not appear sufficient to provide motivation for the skilled artisan to replace the coating step in EP '973 with the vapor treatment step claimed. As noted by applicants, Kanner is specifically drawn to the treatment of -OH containing surfaces for water repellency. There is nothing in EP'973 that would suggest the presence of surface -OH groups. For instance the compositions in the examples are hydrosilylation cured and the silica therein has already been surface treated. This suggests an absence of surface -OH groups. Thus there is nothing to indicate that treating a surface absent of -OH groups by vapor or solution treatment will result in a comparable surface having improved compression set.

5,736,251 is cited as being of general interest. This reference teaches vapor treatment of surfaces having -OH groups with a silane, but fails to teach or suggest the silane required by the claims or the particular silicone rubber claimed. 4,304,805 is also cited as being of general interest. This teaches sealing pipes with vapors of aminosilane but fails to teach or suggest treating silicone rubbers as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
